

General Considerations Scandinavia-(Stage 9)

Norway, Sweden, Denmark & Finland

- Once again, pedal and drive on the **RIGHT** side of the road.
- It's one hour later than in the United Kingdom, so set your watch ahead (3 pm instead of 2 pm) one hour.
- Since there are only a relatively small number of Norwegians, Swedes, Danes and Finns, many speak excellent English, so they "can speak to more people", as one local explained.
- Each Scandinavian country uses a different type of currency with its own exchange rate against the USD. The following are approx.
 - Norway's Kroner is worth approx 8.6 Kroner to \$1.
 - The Swedish Krona is worth about 8.8 Krona to \$1.
 - The Denmark Krone is worth about 7.8 Krone to \$1.
 - The Finland Markka is worth about 6.3 Markka to the \$1.
- As most have heard, Scandinavia is very expensive, often supporting taxes rates of 20 to 25%. Lots of services and a high standard of living. You can get anything here.
- Lots of remote territory and great people, so keep stocked up on goodies.
- Overall the roads are excellent and we have uncovered many relatively quiet ones for your cycling enjoyment. Many of the major roads were not viable options because of long tunnels, often in a series. Expect a variety of terrain throughout Scandinavia.
- There is also a well developed network of marine highways, many incorporated into Odyssey's routes. Many are big ferries, sometime giant, and can accommodate large vehicles as well as dozens to hundreds of passengers.
- Norway has the most dramatic terrain along Odyssey's Scandinavian route. Lots of Fjords and mountains, including some respectable climbing.
- Watch for grass, trees and bushes growing on the roofs of some Norwegian homes, hotels and cabins.
- Sweden generally has more gentle terrain with lots of lakes and coniferous forests.
- Denmark gets flatter, but still has some challenging terrain.
- Finland is beautiful and even has some shoulders.
- Supposedly, if a bike path is available in any of the Scandinavian countries, and there are many of them, especially in the larger cities, you are supposed to use them. We recommend that you use them on fast, busy or tight roads. Some places you will have to for obvious reasons, so use your best judgement.
- Since Finland is a neighbor of Russia, you will see more Russian influence. Evidently, many of the more affluent Russians spend a fair bit of time in Finland.
- Watch for moose, you might get lucky and see some. They are huge!
- Don't forget warm clothes for the ferry waits and fast, earned descents.
