

General Consideration Central Europe

Germany, Czech Republic, Austria, Switzerland, Liechtenstein, France, Luxembourg, Belgium and the Netherlands

- Ride on the right side of the road.
- Far fewer people speak English than we have become used to. Most do in hotels and in major tourists areas, however.
- Generally the roads and most intersections are well marked.
- Summer and early September are the action months for many. Expect lots of tourists and more traffic.
- The US\$ is rockin'. Here are some helpful currency exchange rates as of August 8, 2000:
 - The Euro is worth about 90¢ to the US\$.
 - In Germany, the dollar is worth about 2.1 German Duetsch Mark.
 - In the Czech Republic, the dollar is worth about 44.6 in Czech Republic money.
 - In Austria, the dollar is worth about 15.26 Austrian Shillings.
 - In Switzerland, the dollar is worth about 1.71 Swiss Francs.
 - In Liechtenstein, the dollar is worth, I believe, about the same as the Swiss Franc.
 - In France, the dollar is worth about 7.27 French Francs.
 - In Luxembourg, the dollar is worth about 39.09 in Luxembourg money.
 - In Belgium, the dollar is worth about 44.7 Belgium Francs.
 - In the Netherlands, the dollar is worth about 2.44 Guilders.
- Lots of cobblestone sections occur on many of Odyssey's roads. We will be spending a lot of time in former Eastern Europe (East Germany and Czech Republic) where some facilities are more limited than in the west.
- Eastern Germany and the Czech republic are still going through major evolution and change. Some parts are clearly second world.
- Shoulders are rare in Germany and elsewhere, but it looks like most people are pretty respectful of cyclists.
- About 20 kms from München we will visit Dachau on our way to Oberammergau.
- Watch for plenty of railroad and tram tracks, especially where trams are used in bigger cities. Many parallel the roads and can be quite hazardous.
- Expect some flat to hilly lands and some outright mountains to climb. Austria is probably the tidiest country in Europe.
- Plenty of bike paths exist in several of the countries we are going through.
- Bike paths are everywhere in the Netherlands-but they make designing a route difficult since they often stray from the main roads.

Camping: We will probably camp near the river by their middle bathroom facility.

Toilets: There are at least 16 toilets for our use in three facilities.

Showers: There are at least 16 showers for our use in three facilities.

Dinner: Dinner will be at or near the campground from 7:00 to 8:30 pm.

Breakfast: Breakfast will be at or near the campground from 6:30 to 8:00 am.

Tomorrow: 138.8 kms. Level ride along the beautiful Mosel River. This drive is a popular tourist draw so expect traffic. There are a few detached bike paths worth using; however, some of the bike lanes are two way on the shoulder of the road, meaning you will be riding into traffic-not a good idea.
